

Daniel Moreno

SOFTWARE & VIDEO GAMES DEVELOPER

PROFILE

Video Game Development student with a strong interest in entering the job market. Experienced in both individual and team projects.

I am a curious person who enjoys being involved in every stage of development, from programming and architecture design to the artistic side.

ACADEMIC BACKGROUND

Degree in Video Game Development

Universidad Complutense de Madrid
2022 – 2026

I have a solid background in C, C++, and C#, applying object-oriented programming, advanced algorithms, and multithreading. I have worked with engines such as Unity and Unreal, as well as developing custom engines and internal tools, integrating graphics libraries and simulation systems. I have implemented artificial intelligence systems (decision trees, neural networks, CBR), physics simulation, and scalable software architectures. I also have experience in mobile development using Android Studio and the Android SDK, as well as integration with Sony SDKs.

WORK EXPERIENCE
